Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 34-35, 38, 40-44, and 47-52, drawn to a table saw, classified in class 83, subclass 58.

II. Claims 53-55, drawn to a table saw, classified in class 83, subclass 62.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, invention I has a separate utility such as it could be used without a frame that is coupled to the rotatable blade and the brake positioning means that pivots the blade up and down relative to the blade as the elevation of the blade relative to the table is changed, as set forth in invention II. Conversely, invention II has a separate utility such as it could be used without the brake that engages the blade when the detection system detects a dangerous condition and pivots up and down relative to the table, as set forth in invention I. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their divergent subject matter, restriction for examination purpose as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with CFR 1.48(b) if one or

Art Unit: 3724

more of the currently named inventors is no longer an inventor or at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR. 1.143).
